

ADVANTAGES

- Microfine glass media, with continuous glass filament separators formed into a single mini-pleat filter pack.
- Available with bubble-tight, guillotine or radial blade bow tie damper for precise air volume control.
- 95% at 0.3 μ to 99.9995% at most penetrating particle size (MPPS).

Application	Pharmaceutical and semiconductor manufacturing facilities, medical facilities and other clean process applications.
Max Temperature (°C)	93° C, 200° F
Comment	Tested in accordance with IEST Recommended Practice for Testing HEPA Filters. UL 900. Please consult Literature 3420 for detailed information.
